

## **More Protection with NXT-ID's Wocketâ,,ç Smart Wallet; Securely Store All Your Passwords in Your Own Personal Vault**

June 10, 2014 10:34 AM ET

SHELTON, Conn., June 10, 2014 /PRNewswire/ -- NXT-ID, Inc. (OTCQB:NXTD), a biometric authentication company focused on the growing mobile commerce market, revealed today its Wocketâ,,ç Smart Wallet will include a password storage feature, further demonstrating the versatility of Wocketâ,,ç to store and protect a wide range of private information. With this password list feature, Wocketâ,,ç owners can store and securely access all their login credentials such as usernames and passwords on a Wocketâ,,ç in addition to payment, loyalty, identity and other cards typically held within a wallet. Users will be soon be able to utilize Wocketâ,,ç for secure, biometrically locked, password storage in lieu of similar online solutions where data is at risk.

"Passwords continue to be a difficult issue for consumers. 2013 was clearly the "Year of Personal Data Breach", with 110 million credit and debit card account numbers lost to hackers by Target alone," says David Tunnell, CTO of NXT-ID. "Heartbleed and other security vulnerabilities demonstrate the need for a new method for consumer's to protect their private data. Users all over the world utilize online password storage services to store thousands of passwords behind one master password. If a hacker were to gain access to that one master password, they would gain access to all the user's passwords. That is the root of the problem with online storage of private data."

Wocketâ,,ç enables users to store and encrypt their passwords locally, and securely inside their own smart wallet. Wocketâ,,ç owners will also be able to store other sensitive information such as Social Security Numbers and insurance cards on Wocketâ,,ç instead of online servers and applications where their identity is potentially vulnerable.

Wocketâ,,ç is a smart wallet in the same vein as the smart phone and smart watch. NXT-ID is introducing its innovative, patent-pending Wocketâ,,ç as the next natural step in the evolution of smart devices. Wocketâ,,ç is a next generation smart wallet designed to protect your identity and replace all the cards in your wallet, with no smart phone required. The Wocket works anywhere credit cards are accepted and only works with your biometric stamp of approval.

Credit, debit, ATM, loyalty, gift, ID, membership, insurance, ticket, emergency, medical, business, contacts, coupon, and virtually any card can be protected on Wocketâ,,ç. More than 10,000 cards, records, coupons, etc. and 100 voice commands can also be stored on Wocketâ,,ç.
